DOH-ST. LUCIE
PUBLIC HEALTH OVERVIEW
2016
BROADENING CONNECTIONS
www.stluciecountyhealth.com
Dear St. Lucie,

Florida Department of Health in St. Lucie (FDOH-St. Lucie) is committed to working for you. Our dedicated staff works on your behalf to improve health in our great county. Public health has a diverse portfolio of programs and activities, each designed to protect and improve the health of St. Lucie’s citizens. During the past year, Department staff continued working together with community partners to provide access to valuable health programs and services, educating citizens on healthier living and building broader connections that will allow public health practitioners to collaborate across sectors in innovative and sustainable ways. These partnerships are ultimately what ensures the success of public health initiatives.

For instance, the health department is an active member of The Roundtable of St. Lucie, a group of St. Lucie County leaders who work together to accomplish system change resulting in improved outcomes for St. Lucie youth. It is very rewarding working with community partners and knowing we are making a difference. This past year we started a process called Fetal Infant Mortality Review to analyze root causes of infant health disparities; we adopted an evidenced-based campaign called 5210 Let’s Go to raise public awareness about the importance of healthy eating and exercise for children through schools and child care centers, and worked closely with the United Way St. Lucie County to identify and focus on health priorities.

Moving forward we will also concentrate on programs to increase childhood vaccines to prevent disease and keep children protected from health threats, build a framework to increase health equity to ensure everyone has an opportunity to achieve healthier outcomes, decrease inhaled nicotine use to provide a longer and healthier life for St. Lucie citizens, and work with partners to develop and implement a strategy to combat the heroin epidemic.

Thank you for continuing to put your trust in FDOH-St. Lucie. Our dedicated team of 175 staff will continue to work in our community-both visibly and behind the scenes-to ensure improved health for all in St. Lucie.

Clint Sperber, MPA
Administrator and Health Officer
To improve the well-being of St. Lucie County residents, Healthy St. Lucie expanded their infrastructure this past year. A Food Policy Council was established to assess how our community supports healthy eating and a Physical Activity Council was formed to promote physical activity opportunities and community challenges. To learn more go to the Healthy St. Lucie website at: www.healthystlucie.org

STUDENTS WORKING AGAINST TOBACCO
The St. Lucie County SWAT has participated in seven (7) events with community partners reaching over 1000 youth and adults with tobacco control messaging. Sebastian Suarez and Maddie Chabab from Lincoln Park Academy were elected to the state Youth Advocacy Board. Sebastian currently serves as the statewide Chair. Recruitment efforts are ongoing for youth ages 11-17 or grades 6th -12th.

TOBACCO FREE PARTNERSHIP OF ST. LUCIE COUNTY
While many tout e-cigarettes’ ability to help smokers quit, the Food and Drug Administration has not approved electronic cigarettes as a quit aid. In 2015, nearly 6 in 10 e-cigarette users were also conventional cigarette smokers. Tobacco Free Florida has effective tools and resources to help you Quit Your Way.

Visit Tobacco Free Florida at: www.tobaccofreeflorida.com

St Lucie County (SLC) was highlighted in the SILENCE IS DEATH Report in 2006 where severe racial and ethnic HIV/AIDS, disparities reached epidemic proportion.

In 2005, St Lucie County had the highest number of blacks living with HIV in the State. One in 35 black residents was diagnosed at this time, compared to only one in 710 whites. A huge disparity existed between the two racial groups. During this time, HIV/AIDS was listed as the leading cause of death among black males aged 25-44yo. This was a crisis that caused a call to action in our community. Now, ten years later, we are proud to say that through the commitment of the community and strong leaders, we have had the largest decrease in new HIV infections in the State.

St. Lucie County 10 Years Later!
We now rank number 19 out of 67 counties, a huge accomplishment, yet there is still much work to do. If you would like to become part of the solution for this ongoing public health threat you many do so by joining our Consortia, Care Network of the Treasure Coast (CNTC) and the Prevention Planning Group (PPG).

Remember! “We Cannot Fix What We Will Not Face”
–James Baldwin

In 2016, there were 1,037 travel associated cases of Zika virus in the State of Florida with 11 of those in St. Lucie County residents. The type of mosquitos that carry and spread Zika, dengue, and chikungunya viruses live in St. Lucie County. If you get a mosquito bite, watch for fever, rash, joint pain, and redness in the eyes. If you suspect you are sick, call your doctor or the Health Department. As summer approaches and the mosquito population rises, it is important to prevent mosquito bites and protect yourself against Zika and other mosquito-borne diseases. Drain standing water in your yard, cover yourself with light colored clothing and use an EPA approved mosquito repellent.
SCHOOL HEALTH SERVICES

Our school health nurses provide services for students in the St. Lucie County Public Schools and consult with private schools. Services include health screenings for growth and development, dental, scoliosis, hearing and vision. We also assess and monitor for communicable disease as well as the provision of health education to prevent disease.

We partnered with Healthy Schools LLC and the St. Lucie County Public Schools to support flu vaccines in school settings.

HEALTH SCREENINGS FOR KG, 1ST, 3RD AND 6TH GRADES:

12,066 – Vision | 8,059 - Hearing | 2,881 – Scoliosis
8,171 - Growth and Development

SCHOOL HEALTH SERVICES:

27,453 – Nursing Assessments | 99,394 – Staff/Parent Consultations
1,854 - Care Plan Development

CHILDHOOD IMMUNIZATIONS

Our WIC and School Readiness programs review immunization records on all clients to ensure that the immunizations are up to date for both WIC clients and those in childcare settings. We are currently working on a new initiative to provide vaccines on site at some childcare facilities.

Provided 8,068 childhood immunizations at our health department.

LET’S GO!

5 or more fruits and vegetables
2 hours or less recreational screen time
1 hour or more of physical activity
0 sugary drinks, more water

2016 WIC SUCCESSES

(Women, Infant and Children Program)

WIC provides essential nutrition support for pregnancy, infancy and early childhood. Research shows WIC played a key role in reducing obesity in preschoolers nationwide.

Obesity and overweight in children age two to five years dropped by 7.0% between December 2009 and December 2016, reaching a low of 26% for St. Lucie WIC.

WIC provided nutrition counseling and nutritious foods to 11,898 eligible pregnant, breastfeeding, post-partum women, infants and children under age 5.

WIC St. Lucie West office “new” hours are Monday 10am to 7pm and Tuesday to Friday 8am to 5pm. Ft Pierce office hours are: Monday 9:30am to 6:30pm and Tuesday to Friday 8am to 5pm.

SAFE KIDS

Safe Kids St. Lucie Coalition provided education to over 12,000 students and parents participating in summer programs, community and back to school events.

SAFETY EDUCATION PROGRAMS AND NUMBER OF PARTICIPANTS

Home Safety – 1,050 | Bike Safety – 3,222 | Pedestrian Safety – 2,991
Car Seat Inspection/Installs – 490 | Kids In and Around Cars – 201
Fire Safety – 889 | Medication Safety – 100 | Sports Safety – 2,185
Water Safety – 1,016

When the Coalition lost federal funds used to provide discounted car seats to residents in St. Lucie – it was our Children’s Services Council who understood the importance of the Child Passenger Safety program and provided the financial support needed to sustain the program.

This past year the Coalition was awarded the Safe Routes to School Grant, which allowed the bicycle and pedestrian safety programs to expand.
